After surveying the site and the proposed change in the building plans, I have no issue with the construction to move forward as requested. The contractor has indicated that he would continue to monitor and upgrade the current hard packed surface as necessary to maintain its integrity after heavy rains or snow until a binder coat can be laid sometime in April.

I am wondering how the inspection went this morning.

Can you please respond to this email and let me know your comments.

If Sotir comes before the ZBA to ask for changes, I would need to know your thoughts and concerns.

Thank you,
